

## **CXM-302-3: Designing, Deploying, and Managing Enterprise Mobility Solutions with Citrix XenMobile**

### **Course Overview**

This course provides the skills necessary to install, configure, and integrate components in a Citrix XenMobile Enterprise solution. Students with little or no XenMobile experience will gain an understanding of the components of a XenMobile solution and their function. Students will deploy and configure the XenMobile Enterprise solution, apply principles to enroll mobile devices, install mobile apps, and use policies to manage device and application usage in a lab environment. In addition, topics such as how to integrate additional Citrix products and applications as part of the solution and how to troubleshoot some of the most common implementation issues will be discussed.

### **Audience**

This course is designed for IT professionals, systems engineers, server administrators, and Citrix Partners.

### **Preparatory Recommendations**

Citrix recommends that students bring a mobile device (iPhone or Android) to complete device enrollment and Worx-related exercises.

### **Instructional Method**

This course is offered in instructor-led (ILT) format with demonstrations and application of concepts through hands-on exercises in a live lab environment.

### **Key Skills**

Upon successful completion of this course, learners are able to:

- Explain the XenMobile Enterprise end-to-end architecture and identify each component in the solution.
